

A Guide to Previewing your project area

Cetopo's preview feature allows users to visualize and verify their selected project sites before creating projects or downloading models. This ensures you're working with the right area and data every time.

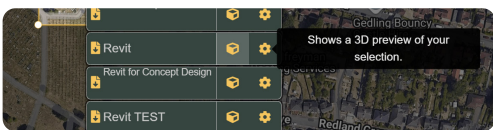

- **Step One:** Select your area
- Choose your desired project area using the selection tools in the map view.

- **Step Two:** Access 2D previews
- Find the template you wish to preview in the Image-tab in the template menu at the bottom-center of the map view.

- Click the eye icon next to the template name to open the preview.

- **Step Three:** Access 3D previews

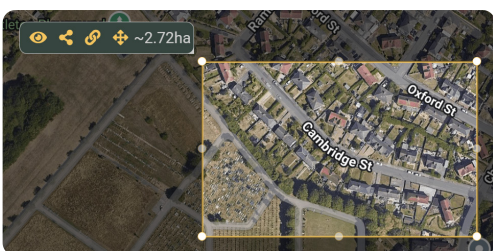

- Find the template you wish to preview in the CAD-tab in the template menu at the bottom-center of the map view.

- Click the cube icon next to the template name to open the preview.

- **Step Four:** Utilize 3D preview tools

- Expand the tool and settings panel from the top-right corner of the 3D preview to access various tools for site analysis.

- **Step Five:** Save or share your selection

- Click the share icon in the small menu at the top-left corner of your selection to save or share it.

- Selections are downloaded as JSON files and can be easily dragged and dropped onto the map view to reactivate them later.
